

# Sudoku Compilation

## Group 1: Thermo Sudoku (*Hausigel*)

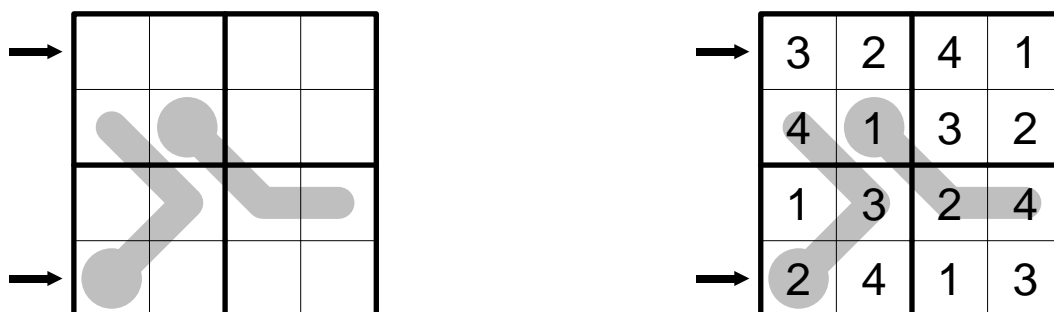

A new puzzle series is commencing on my blog. To be precise, this is a Sudoku series; its goal is to promote the most common Sudoku variants. Each set will consist of six 6x6 Sudokus.

This is the first group of the series. I hope you enjoy the puzzles. You can check your solutions via the *PuzzleCheck* tool.

**Puzzle instructions:** Enter numbers from 1 to 6 (1 to 4 in the example) so that each number appears exactly once in every row, every column and every outlined region.

Inside each thermometer the numbers must be strictly increasing (starting from the bulb).

**Example and Solution:**

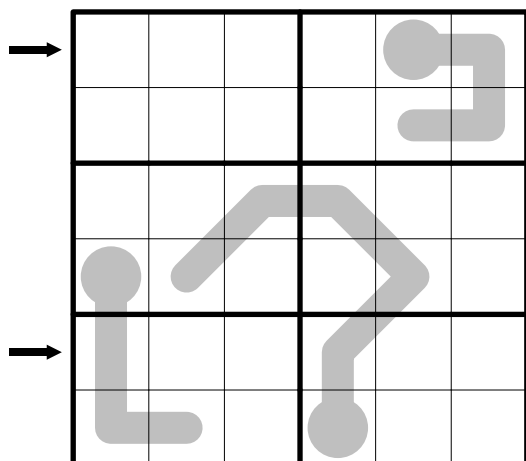

**Solution code:** Enter the contents of the two marked rows (first the upper one, then the lower one).

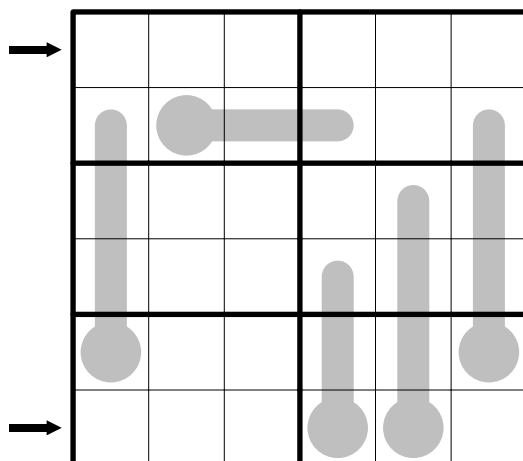

In the example, the solution code would be: **3241 2413**

**Note regarding syntax:** The *PuzzleCheck* tool will ignore all characters except digits, hence spaces and separators (such as commas) can be entered at will.
