

Sudoku Compilation

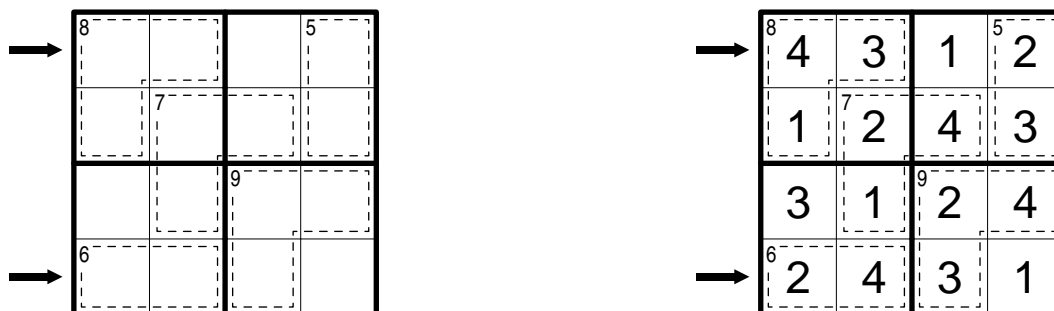

Group 2: Killer Sudoku (*Hausigel*)

This is the second set in our new Sudoku series. Have fun!

Puzzle instructions: Enter numbers from 1 to 6 (1 to 4 in the example) so that each number appears exactly once in every row, every column and every outlined region.

In each cage the numbers must add up to the sum indicated in the upper left corner. Numbers must not repeat within a cage.

Example and Solution:

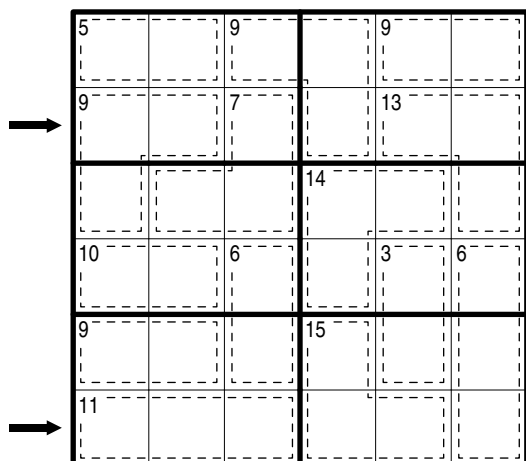

Solution code: Enter the contents of the two marked rows (first the upper one, then the lower one).

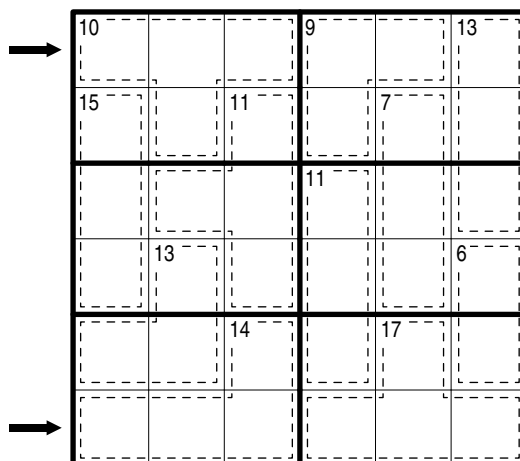

In the example, the solution code would be: **4312 2431**

Note regarding syntax: The *PuzzleCheck* tool will ignore all characters except digits, hence spaces and separators (such as commas) can be entered at will.
